

Summary:

"India is facing an epidemic of diabetes. At present, confirmed diabetes patients in India are 67 million, with another 30 million in prediabetes group. By 2030, India will have the largest number of patients in the world. Diabetes is not only a blood sugar problem, but brings along other complications as well"

Sweet Circle cover recent developments in the management of diabetes & its complications encompassing key topics related to SGLT2 Inhibitor – A new tool to manage T2DM and Significance of Postprandial Hyperglycemia in managing Indian T2DM patients are other extremely vital updates to a clinician's knowledge.

Objective –

To discuss the current challenges HCP's face in the management of diabetes & its complications and discuss SGLT2 Inhibitor – A new tool to manage T2DM and Significance of Postprandial Hyperglycemia in managing Indian T2DM patients by conducting Round table meeting (RTM) pan India.

Sweet Circle was conducted by Asian Society of Continuing Medical Education pan India.

The sole objective of Sweet Circle was designed to get the Diabetologist, Endocrinologist and General Physician on one platform for exchanging their views and sharing their clinical experiences with others about the challenges in the management of Diabetes.

Total 12 RTM has been conducted pan India from June 2016 to September 2016 i.e. Punjab, Kerala, Andhra Pradesh, Odisha, Tamilnadu, Bihar, Telangana, Madhya Pradesh, Rajasthan, Kolkata, Kerala and Assam etc.

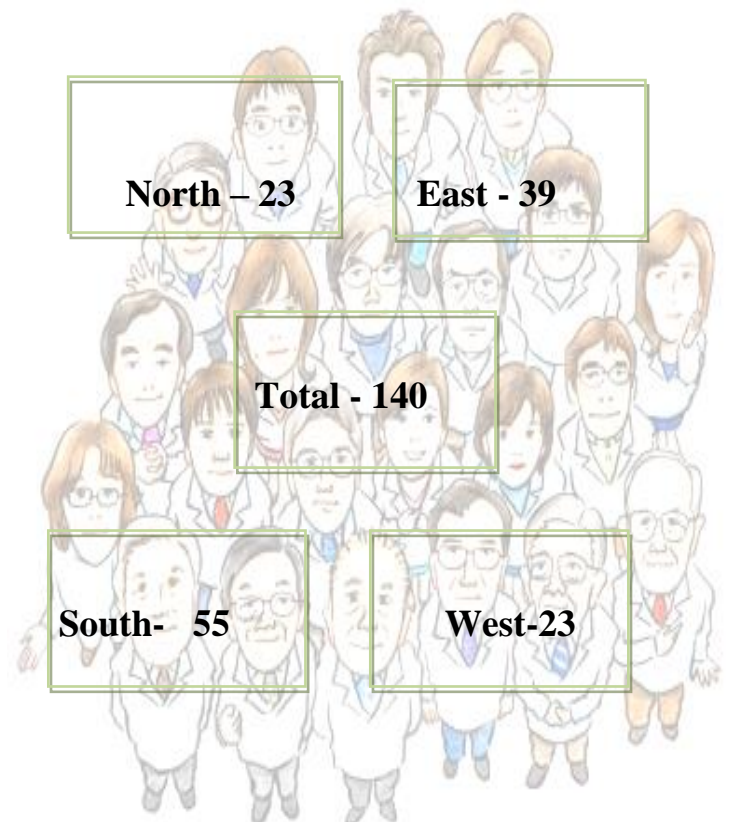

Total No. of doctors attended RTM: 140

The RTM was also conducted in Hospitals, in collaboration with association.
